

RIDHAM MAYANK MEHTA

Full Stack Developer

+91 7600637636 | ridhammehta940@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | India

PROFESSIONAL SUMMARY

Full Stack Developer with 2.5+ years of hands-on experience designing and delivering scalable, production-grade applications across fintech, IoT, e-commerce, and government domains. Proficient in Java, Kotlin, Angular, ReactJS, Spring Boot, and PostgreSQL, with a strong foundation in RESTful API design, real-time communication using WebSockets, and third-party integrations including payment gateways and messaging APIs. Proven ability to lead end-to-end project delivery — from requirements and architecture to deployment — while mentoring junior developers. Adept at working in agile environments with GitLab CI/CD pipelines and cross-functional teams to consistently ship high-quality software on schedule.

SKILLS

Languages:	Java, Kotlin, Python, JavaScript, TypeScript, HTML, CSS
Frontend:	Angular, ReactJS, NextJS, Tailwind CSS
Backend:	Spring Boot (Java / Kotlin), Node.js, Express.js
Database:	PostgreSQL, MongoDB
DevOps & CI/CD:	GitLab CI/CD Pipeline Scripting, Deployment Basics, Build & Release Automation
Version Control:	Git, GitHub

EXPERIENCE

Software Engineer · Potent Global Solutions · Bardoli, Gujarat

Aug 2023 – Present

Tech-Stack: Angular, Java, Kotlin, Python, PostgreSQL

- Architected and developed a complete Shift Management System with shift creation using only start/end time (no date dependency), strict overlap validations, and scheduling UI with a smart copy mechanism to replicate schedules across dates, significantly reducing manual operational effort. Built Operator Punch interface with dynamic dropdown filtering, auto shift detection, and Date of Birth authentication validation.
- Designed and implemented the Connectivity Menu in WatchTower supporting industrial IoT integrations — configured OPCDA, OPCUA, Modbus, and Siemens S7 protocols. Developed Tag Management and Data Storage Mapping for SCADA/PLC device data persistence into respective databases for monitoring and analytics.
- Core engineer behind PGSCConnect for Gram Panchayats — developed Excel bill extraction logic, bill upload workflows, and broadcast messaging. Engineered real-time chat using WebSockets and Webhooks. Integrated PayU and BillDesk payment gateways enabling villagers to pay tax bills digitally via mobile/WhatsApp, eliminating manual door-to-door collections.
- Led development of PartsPlex (Canada) — Admin Panel and E-commerce platform for automobile parts. Integrated Moneris payment gateway, designed a multi-tier discount engine (part-specific, customer-specific, repair-shop flat), and implemented real-time inventory validation post-payment. Mentored and led a team of 4 developers.
- Developed AutoPlex Invoice Parsing System using AI prompt engineering to extract structured data from multiple invoice formats, significantly improving invoice handling accuracy.
- Architected and led CFC Platform with Dynamic Forms and Dynamic Arrays powered by Strapi CMS and Angular. Built franchise wallet system, operator assignment workflow, and complete service request lifecycle for PAN, ITR, Aadhaar, and Insurance services.

Project Coordinator · AlphaBI

Jan 2023 – May 2023

Tech-Stack: ReactJS, NextJS, Node.js, Express.js, MongoDB

- Led project management for various full-stack software development projects; conducted quality control checks and prepared regular project status reports for the team.
- Developed a Software Consultancy web app hosted on Netlify.

Frontend Development Intern · AlphaBI

May 2022 – Jun 2022

Tech-Stack: HTML, CSS, JavaScript

- Built responsive UI components; collaborated with the team on design implementation and conducted testing and debugging to ensure performance stability.

PROJECTS

Live links for all projects are available on my portfolio: ridham-mehta-portfolio.netlify.app

DropBazaar — Indian Dropshipping Platform

Tech-Stack: ReactJS / Angular, Node.js, PostgreSQL

- End-to-end dropshipping web application with a full-featured Admin Panel designed for the Indian market. Enables product listing, supplier management, order processing, and customer-facing storefront within a single unified platform.
- Admin panel supports inventory management, pricing controls, order dispatch tracking, and multi-vendor operations tailored for Indian dropshipping workflows.

Adala Badali — Clothing Rental App

Tech-Stack: Angular / ReactJS, Spring Boot, PostgreSQL

- Rental platform for clothing built for a New Zealand client — supports uploading all types of sarees and ethnic wear, enabling customers to browse, rent, and return items seamlessly.
- Features include item availability tracking, rental duration management, return workflows, and a storefront optimized for ethnic clothing categories.

Object Detection

Tech-Stack: Flutter, Dart

- Real-time object detection project built with Flutter and Dart as part of Design Engineering coursework in 2022. Focused on camera-based detection and UI integration.

Software Consultancy Web App

Tech-Stack: ReactJS

- Designed and developed a software consultancy website showcasing expertise in delivering innovative software development services, hosted on Netlify.

EDUCATION

B.E. Computer Science and Engineering

Jun 2019 – May 2023

Gujarat Technological University, Ahmedabad

TRAINING / CERTIFICATIONS

- Google Cloud Big Data and Machine Learning Fundamentals
- Production Machine Learning Systems
- Feature Engineering
- TensorFlow on Google Cloud
- Python For Data Science (NPTEL)
